easescreen: Pioneering Partnership with Sharp NEC's 2nd Generation MultiSync® ME Series

easescreen proudly announces its collaboration as the first Sharp NEC CMS Partner compatible with the new Android platform. This groundbreaking partnership marks an exciting development for both companies.

The 2nd Generation MultiSync® ME Series marries robustness with elegance, offering a sleek and modern design that seamlessly integrates into diverse applications and environments. With an Android 13 CTS-compliant Operating System, the 2nd Generation MultiSync® ME Series introduces the latest features and security measures, empowering signage applications and ensuring compatibility with CMS partners like easescreen. Sharp NEC's dedication to delivering value without compromising on quality and sustainability aligns with the ethos of easescreen, creating a synergy that elevates digital signage performance.

The newly conformed compatibility between easescreen and Sharp NEC's 2nd Generation MultiSync® ME Series ensures a seamless integration, providing users with a powerful and cohesive digital signage solution: businesses can enjoy the flexibility of easescreen's content management coupled with the 2nd Generation MultiSync® ME Series' modern design, offering a dynamic and adaptable platform. The integration of easescreen and Sharp NEC also guarantees robust security features, reliable performance, and a future-proof solution for businesses seeking a competitive edge.

"We are thrilled to support any signage project with easescreen, as it stands as one of the first CMS Partners that has fully integrated with our new 2nd Generation MultiSync® ME Series. The combination of this powerful CMS system and our well-engineered displays offers a highly valuable solution to the signage market.", says Nils Karsten, Business Segment Lead Retail. Peter Feldbaumer, CTO of easescreen, also expresses enthusiasm for the collaboration with Sharp NEC: "Sharp NEC has an exceptional technical team that supported us during implementation, making it a pleasure to work with them. We recognized the 2nd Generation MultiSync® ME Series as being of high quality right from the beginning of the development process, encompassing both hardware and firmware."
